

LIGHT THE NIGHT[®] WALK

WINNIPEG, BRING LIGHT TO THE DARKNESS OF BLOOD CANCERS

Walk with us on Saturday, September 29 at The Forks Festival Grounds, as we gather together with families, friends and coworkers to celebrate, honour and remember those touched by cancer.

LightTheNight.ca/register

Blood cancers are the 4th most diagnosed cancer in Canada, yet the survival rates are much lower than many other cancers. Research tells us that 68% of Canadians would feel helpless if they or someone they were close to was diagnosed with a blood cancer.

You can bring hope to the blood cancer community.

The Leukemia & Lymphoma Society of Canada is dedicated to supporting patients at any stage of their cancer journey; providing information and vital support services. The money raised will also go to the most promising blood cancer research taking place at cancer centres across Canada.
